

STATEMENT ON SAFETY RECALL 6724E

SUDDEN BRAKING ON CERTAIN 2024MY CX-90 VEHICLES

WASHINGTON, DC. (May 24, 2024) – Mazda North American Operations (MNAO), on behalf of Mazda Motor Corporation, has filed a safety defect notification with the National Highway Traffic Safety Administration (NHTSA) for a concern which exists on certain 2024MY CX-90 vehicles.

While driving, the brakes may activate suddenly due to the false detection of certain objects at low speed (10-15 mph). The automatic braking system may falsely detect a vehicle's reflection as an approaching object (such as a diagonal metal wall or similar object on the side of the road) due to improper programming of the Vehicle Control Module (VCM). In this condition, unintentional/sudden braking may occur. Although the brake lights will illuminate, this may increase the risk of a rear-end accident. There is no warning prior to the sudden increase in braking.

There have been no reports of any accidents or injuries due to the defect.

Approximately 9,914 2024MY CX-90 vehicles are affected in the U.S. and U.S. Territories.

Affected owners will be notified by U.S. Mail. Please check mazdarecallinfo.com or nhtsa.gov for the latest updates.

About Mazda North American Operations

Proudly founded in Hiroshima, Japan, Mazda has a history of sophisticated craftsmanship and innovation, and a purpose to enrich life-in-motion for those it serves. By putting humans at the center of everything it does, Mazda aspires to create uplifting experiences with our vehicles and for people. Mazda North American Operations is headquartered in Irvine, California, and oversees the sales, marketing, parts and customer service support of Mazda vehicles in the United States, Canada, Mexico and Colombia through approximately 795 dealers. Operations in Canada are managed by Mazda Canada Inc. in Richmond Hill, Ontario; operations in Mexico are managed by Mazda Motor de Mexico in Mexico City; and operations in Colombia are managed by Mazda de Colombia in Bogota, Colombia.
