

CX-30 2.5 TURBO ADVANCED TECHNOLOGY IMPRESSES

2021 MODEL FURTHERS I-ACTIVSENSE SAFETY SUITE

Many are always looking to the latest and greatest technologies to help ease their everyday lives. The same can be said for vehicles in CX-30's segment, with owners holding high value in advanced technologies. The [CX-30 2.5 Turbo](#) adds to the brand's impressive [i-Activsense](#) suite of safety features with new Smart City Brake Support Reverse and Rear Cross-Traffic Braking. These safety features can help a driver by automatically applying the brakes when the vehicle is reversing at speeds between 2 to 4 mph and an obstacle is detected, or when a crossing vehicle is sensed as the driver is backing out of a parking space. Just an additional level of precaution as you depart one adventure for the next one.

Further adding to the crossover's litany of advanced technologies is the 360° View Monitor which has been upgraded with high-definition digital clarity. This latest version uses a digital communication network, so digital images are rendered with higher precision and dramatically less image distortion than analog camera systems. The system offers user-selectable camera views and dynamic guidelines, allowing for safer navigation of tight spaces, more precise parking or even through uneven terrain. The 360° View Monitor can be used at low speeds, up to 9 mph, which can be useful for those occasions when the CX-30 2.5 Turbo is exploring the unbeaten path.

The CX-30 2.5 Turbo encourages the driver to seek out open roads and new adventures, but for those occasions the road is less than inspiring, Traffic Jam Assist, a new support technology for the brand can help ease the commute. This feature enhances Mazda Radar Cruise Control by providing steering assist to help keep the car centered in the lane at speeds under 40 mph.

Additionally, the [2021 CX-30 2.5 Turbo](#) offers Adaptive Front-lighting System and Blind Spot Monitoring for safer navigation on everything from winding mountain roads to bustling parking garages. Features like Mazda Connected Services, power liftgate and rear air conditioning vents help make everyday commutes and grand adventures as functional as they are thrilling.

Combined, these advanced technologies make it possible to fully embrace the powerful driving dynamics and fine craftsmanship of the 2021 Mazda CX-30 2.5 Turbo because they help empower drivers to confidently take on new roads.
