

2019 MAZDA6

Mazda vehicles are designed with the driver in mind and having an active approach to safety can help build upon a premium driving experience with even more peace of mind. Confident driving is better driving, and the updates to the 2019 Mazda6 demonstrate Mazda's commitment to providing its customers with advanced safety technologies.

In the previous model year, the two top-tier trims, Signature and Grand Touring Reserve, allowed customers to enjoy another level of sophistication with plenty of premium features for the midsize sedan. Likewise, customers were excited about the turbocharged Skyactiv-G 2.5T engine being added to the powertrain lineup. Following that success, for the first-time ever, all 2019 Mazda6 trim levels are now standard with the entire suite of i-Activsense safety and driver-assisting technologies.
